# **WEATHER OF CONCERN**

### **Weather of Concern**

- Strong north to south pressure gradients will bring continued gusty Sundowner winds to southern Santa Barbara County though early Monday morning. The winds are expected to shift to the northeast late tonight and increase over the Montecito Hills.
- Gusty northerly winds will also continue to impact the I-5 Corridor in the LA and Ventura County Mountains.
- The main impacts of the winds will be hazardous driving due to strong cross winds, especially for high profile vehicles.
- The main roadways affected will be the I-5 Corridor and Highways 101 and 154 in southern Santa Barbara County.

### Weather Advisories, Watches, and Warnings currently active in California:

### **Active Weather Warnings, Watches and Advisories by County:**

http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1

# **WEATHER SYNOPSIS BY REGION**

### **NORTHERN CALIFORNIA**

Ridging, which includes drier and warmer weather, will affect the area into today before breaking down tomorrow.

Weather models continue to show a series of Pacific waves, ushered in by a strong Pacific jet, impacting the region during the rest of the week and lasting into the weekend. The impact type and timing is less certain although expect some wetting moisture favoring the northern tier. Temperatures would also trend cooler with each wave passage and expect periods of stronger W-SW winds.

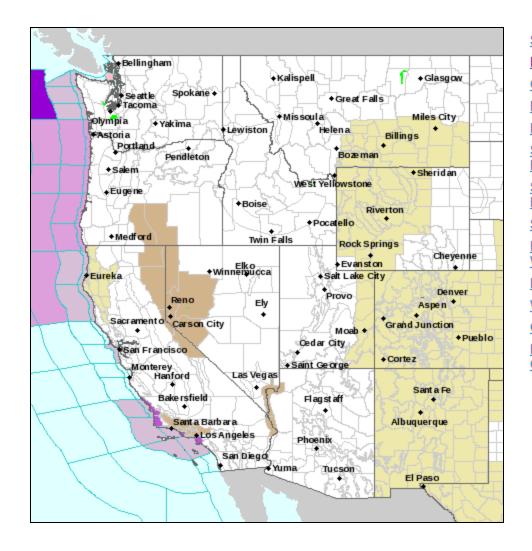

### **SOUTHERN CALIFORNIA**

A ridge of high pressure will build into California from the Pacific Ocean causing temperatures to warm to 10 to 15 degrees above normal and minimum humidity to drop into the teens today and tomorrow. Temperatures will reach the low 90s over the warmer valley locations early this week. There will be local northeast winds of 10 to 20 mph with gusts to 35 mph over the mountains and below the canyons and passes of the region this morning.

Another Pacific trough will approach and move inland across California bringing a significant cooling trend and an increase in humidity Wednesday and Thursday. Scattered showers with light rainfall totals will move across Central California Wednesday night and Thursday.
